

Neuroscience Society Young Investigator Award (Alphabetical order)

■ Aurelio Cortese

Computational Neuroscience Laboratories, ATR Institute International
Title : Metacognitive resources for adaptive learning

■ Sayaka Inoue

Dept. Psychiatry and Behavioral Sciences, School of Medicine, Stanford University
Title : Internal physiological states-dependent modulations of neural circuits that control behaviors

■ Ryohei Iwata

VIB-KU Leuven Center for Brain & Disease Research
Title : Investigation of the mechanisms underlying the interspecies temporal differences of neurodevelopment processes

■ Tetsuya Takano

Department of Neurophysiology, Keio University School of Medicine
Title : Mapping and identification of tripartite synaptic cleft molecules by Split-TurboID in vivo

■ Takashi Yamaguchi

New York University School of Medicine Neuroscience Institute
Title : Neural generation of social behaviors in limbic-hypothalamic circuits
